

## EMAIL MARKETING CHECKLIST: By [Francis Waithaka – Digital Marketer](#)

I was inspired to create this email checklist by the team from [Muthaiga Country Club](#) who we trained in our [February Digital Marketing Masterclass](#). It will help you increase your email open rates and get more engagement for your brand. Ensure you have an email service. If you don't, I've created a summary to help you choose the right tool. An email marketing service helps you automate your marketing workflows, track your email performance, send more and better emails, and build a deeper relationship with your customers and prospects.

	CHECKLIST	STATUS
1.	<p><b>SEGMENTATION:</b></p> <ul style="list-style-type: none"><li>• Have you segmented your email lists so that your message is relevant to your audience?</li><li>• Create different segments/groups/lists according to their unique profiles</li><li>• Know the likes, dislikes and preferences of each group from your audience.</li><li>• You can segment your email lists according to the following<ul style="list-style-type: none"><li>○ <b>Location?</b> (City, County, Country)</li><li>○ <b>Interests?</b></li><li>○ <b>Age?</b></li><li>○ <b>Gender?</b></li><li>○ <b>Nationality?</b></li><li>○ <b>Income</b></li></ul></li></ul>	

	<ul style="list-style-type: none"> <li>Recipients are 75% more likely to click on emails from segmented campaigns than non-segmented campaigns. (MailChimp, 2017)</li> </ul>													
2.	<p><b>SUBJECT LINE:</b></p> <ul style="list-style-type: none"> <li>Have you written a catchy headline that will make someone want to open the email? Your subject line is the only part most people read &amp; determine whether to open the email or not.</li> <li>Are you communicating something valuable? People care about their personal interests. What is there for me in this email? If there's nothing, I'll not bother opening leave alone replying</li> <li>This data from Retention Science indicates that email subject lines between six and 10 words consistently have the best open rates</li> </ul> <div data-bbox="949 652 1562 1068" data-label="Figure"> <table border="1"> <caption>Email Open Rate by Subject Line Length</caption> <thead> <tr> <th>Subject Line Word Count</th> <th>Open Rate</th> </tr> </thead> <tbody> <tr> <td>0-5</td> <td>~16%</td> </tr> <tr> <td>6-10</td> <td>~21%</td> </tr> <tr> <td>11-15</td> <td>~14%</td> </tr> <tr> <td>16-20</td> <td>~12%</td> </tr> <tr> <td>21-25</td> <td>~9%</td> </tr> </tbody> </table> </div>	Subject Line Word Count	Open Rate	0-5	~16%	6-10	~21%	11-15	~14%	16-20	~12%	21-25	~9%	
Subject Line Word Count	Open Rate													
0-5	~16%													
6-10	~21%													
11-15	~14%													
16-20	~12%													
21-25	~9%													
3.	<p><b>A/B TESTING to determine the best time to send an email:</b></p> <ul style="list-style-type: none"> <li>What time do you send your email?</li> <li>A business (transaction) email and a leisure (club) email should have different timing. Business is when you want to transact. Club is when you want to relax/party or have a private meeting.</li> <li>When you start your email marketing campaign, spend the first few weeks testing what time results in the highest open and click rates.</li> </ul>													

	<ul style="list-style-type: none"> <li>• Don't forget to take time zones into account</li> <li>• <b>What time do you send your email?</b></li> <li>• Weekdays from 6:00am to 11:00am, people tend to spend time reading emails, so the clicks and opening rates are very good and these hours are recommended.</li> <li>• From 3:00pm to 5:00pm, a drop in the work rate is common, and the email usually works as a distraction.</li> <li>• <b>Sunday?</b> Not everyone accesses emails on Sundays and messages end up falling on the first track on Monday, when there's low visibility and many messages end up being ignored or not even read. It is better avoid it.</li> <li>• If you want to sell products related to work such as office supplies, avoid sending your email marketing in periods of rest and recreation, at night or weekends. The chance of them ending up in the recycle bin is huge when opened off-site and working hours.</li> <li>• 11 a.m. has the highest click through rate for email sends. (HubSpot, 2015)</li> </ul>	
4.	<p><b>WRITE WELL:</b> Make sure your copy reads like it was written for a human, not just an inbox.</p>	
5.	<p><b>PERSONALIZATION:</b> Email marketing has a higher return on investment compared to most online advertising</p> <div style="border: 1px solid #ccc; padding: 10px; margin-top: 10px;"> <p>Dear Francis, I'm writing to inform you of our group savings account called M-Chama. M-chama is free to open to members of any registered and non-registered group in Kenya. It comes with a personalized card and you can deposit and withdraw from any Postbank branch, Mashinani and M-Pesa agents. Try it <a href="#">here</a></p> </div>	

6.	<p><b>HAVE A CLEAR CALL TO ACTION:</b></p> <p>Can the reader determine what they're expected to do within 5 seconds? If not, they will delete your email or ignore it altogether. Do you want them to call? Fill a form? Reply? Then state that as you close your email.</p>													
7.	<p><b>MEASUREMENT:</b> After you've sent your emails, check the report and analyse the performance</p> <ul style="list-style-type: none"> <li>• Open Rate – How many people opened</li> <li>• Click through rate – If there was a link on your email</li> <li>• Unsubscribes – How many people unsubscribed (don't want to be contacted)</li> <li>• Marked as spam – Who marked your email as spam?</li> <li>• Bounce rate – How many emails were not delivered because they were invalid?</li> </ul>													
8.	<p><b>SUMMARY:</b></p> <p><b>Why Do People Open And Respond To Emails?</b></p>  <table border="1"> <caption>Why Do People Open And Respond To Emails?</caption> <thead> <tr> <th>Reason</th> <th>Percentage</th> </tr> </thead> <tbody> <tr> <td>Sender name</td> <td>64%</td> </tr> <tr> <td>Subject line</td> <td>47%</td> </tr> <tr> <td>Offer</td> <td>26%</td> </tr> <tr> <td>Intro paragraph</td> <td>14%</td> </tr> <tr> <td>Expected length</td> <td>4%</td> </tr> </tbody> </table> <p>Source: <i>Consumer Pulse</i></p> <ul style="list-style-type: none"> <li>• Use 6 to 10 words in your subject lines to get the best open rate</li> <li>• Send your email campaigns during the week day and in the morning.</li> </ul>	Reason	Percentage	Sender name	64%	Subject line	47%	Offer	26%	Intro paragraph	14%	Expected length	4%	
Reason	Percentage													
Sender name	64%													
Subject line	47%													
Offer	26%													
Intro paragraph	14%													
Expected length	4%													

- |   |  |
|---|--|
| <ul style="list-style-type: none"><li>• Personalize subject lines with the reader's name</li><li>• Use a recognizable sender name</li><li>• Optimize your email campaigns for mobile- Clean and simple images are key when it comes to mobile-optimized emails. Don't overdesign with too many images or embed large image files, because they might take forever to load on phones.</li><li>• Segment your email lists</li></ul> |  |
|---|--|

#### WHAT IS THE ROI OF EMAIL MARKETING?

By most measures, the ROI for email marketing is roughly twice that of other digital channels—if not better. This is because of its targeting and personalization capabilities and cost effectiveness.
